# I Would Like To See You Again

Kenny Rogers

C   **F**   **G7**   **Am**

C   F   C
I was sitting here thinking about some old times
           F   G7   C
Some old times some old friends
               F   C
When suddenly it came across my mind
          F   G7   C
That I would like to see you again

              F   C
Remember how we used to walk and talk
         F G7   C
Walk and talk holding hands
                 F   C
We said we loved each other I recall
        F G7   C
We made a lot of future plans

       F   G7   C
But the years have come and gone
        F   G7   C
And a whole lot has happened since then
    F   G7   C   Am
But tonight your memory's awfully strong on my mind
F   G7   C
And I would like to see you again

        F   C
It's funny how an old flame comes back

```
        F     G7          C
Come on back make you blue
                F                       C
But I just saw a picture of a railroad track
        F         G7          C
An old shack me and you

                  F                   C
I guess I'd better straighten out my mind
            F   G7          C
Straighten it out and go to bed
                      F                   C
And pray that I don't dream about old times
        F       G7          C
Some old times gone and dead
Repeat #3
```
